

2010 Sumitomo Training Schedule

ALL-ELECTRIC

Sumitomo training classes are available at:

- Customer facility
- Atlanta Technical Center
- Los Angeles Training Facility
- Cleveland Training Facility

 **SUMITOMO**
PLASTICS-MACHINERY

The all-electric experts.

Sumitomo Training

Helping molders improve efficiency and overall productivity

Training to meet your needs

Training on Sumitomo all-electric injection molding machines is an on-going service available to our customers. It is designed to help improve your molding efficiency and overall productivity by achieving the optimum performance of your Sumitomo equipment.

A choice of courses

All new Sumitomo injection molding machine customers receive customized training classes. These classes are given in your facility over a 3-day period and offer customized hands-on training on your new Sumitomo machines.

In addition to the 3 days free, in-plant training new customers receive, Sumitomo offers in-depth courses for machine operators, maintenance technicians and process technicians to further enhance their capabilities.

Customized courses can be arranged to be held in your facility using your Sumitomo equipment.

Affordably priced, scheduled training courses are also offered at Sumitomo's training facilities. For example, the 2-day operations and maintenance courses are priced at \$400 and include all training materials and lunches. These courses are also consecutively scheduled, allowing attendees to take both courses in a single trip. The combined cost for taking both courses is also reduced to \$700.

A choice of locations

Sumitomo offers customers a choice of four locations for training:

- Customized training in your facility
- Scheduled training at the Sumitomo Tech Center in Atlanta, GA
- Scheduled training at the Los Angeles Training Facility located in Corona, CA
- Scheduled training at the Cleveland Training Facility located in Strongsville, OH

Scheduled courses for 2010

The next page provides the course descriptions, locations and dates for the scheduled courses.

Operation courses are designed for individuals who already have a basic understanding of injection molding machine functions and operation.

Maintenance courses are designed for individuals who have basic electronics and hydraulic skills as well as a good understanding of injection molding machine functions and operation.

A Processing Fundamentals course is also offered for individuals at the beginner to intermediate level.

2010 Training Schedule

Sumitomo Electric Machine Operation

This course will familiarize you with Sumitomo's latest all-electric machines plus how to take full advantage of the capabilities of the N8/N9/Z control systems to optimize machine performance.

2-day Lecture/Application, 9:00 A.M. to 5:00 P.M.

Course fee: \$400.

Atlanta Tech Center: February 1-2, November 15-16, 2010

Los Angeles Training Facility: May 10-11, 2010

Cleveland Training Facility: November 1-2, 2010

NOTE: For students attending both the Operation and Machine Maintenance courses, the combined cost will be **\$700**.

Sumitomo Electric Machine Maintenance

This course will teach you troubleshooting and maintenance of Sumitomo all-electric machines as well as effective use of the N8/N9/Z control systems.

2-day Lecture/Application, 9:00 A.M. to 5:00 P.M.

Course fee: \$400.

Atlanta Tech Center: February 3-4, November 17-18, 2010

Los Angeles Training Facility: May 12-13, 2010

Cleveland Training Facility: November 3-4, 2010

Processing Fundamentals

This processing course is designed to provide the beginner to the intermediate processor with a good foundation to understand the individual functions of the machine and auxiliaries that make up the plastic injection molding system. Hands-on operation in our technical center will provide you with the confidence to systematically solve molding problems and sharpen your molding skills.

4-day Lecture/Application, 9:00 A.M. to 5:00 P.M.

Course fee: \$700.

Atlanta Tech Center: March 1-4, November 8-11, 2010

Customized training courses on all machine models are available by request and will be quoted separately.

To register for any of the classes above, please use the form found on the next page. For questions regarding training classes, please contact Kevin Walsh at (770) 447-5430, or via email at: K_Walsh@shi-pm.com.
